# Your Pathway to Career Success Starts Here.

Skillzyn Academy is a professional skill-development institute dedicated to bridging the gap between education and industry. We focus on practical, career-oriented training that empowers students to become job-ready in high-demand sectors. Our programs combine expert faculty guidance, hands-on learning, and internship support to help learners build strong career foundations.

## Our Mission

At Skillzyn Academy Private Limited, our mission is to empower students with industry-relevant skills that bridge the gap between education and employment.

## Why Choose Skillzyn?

Industry-oriented training

Practical learning + internships

Expert faculty & real-world projects

Placement assistance

Globally relevant skills

*Programs We Offer*

## **Choose Your Career Track**

- **Healthcare Management & Administration**
- **Diploma in Civil Construction Management**
- **Logistics & Supply Chain Management**
- **Human Resource Management & Industrial Relations**
- **Diploma in Food Safety & Quality Management**
- **QA / QC (Mechanical, Civil, Electrical)**
- **Aviation & Airport Management**
- **Banking & Financial Management**
- **Accounting & Taxation**
- **Fire and Safety**
- **Digital Marketing**
- **NDT Level II**
- **Oil and Gas Operations**
- **Electric Vehicle (EV) Design**
- **Montessori Teacher's Training**

## QA | QC Civil

### Duration

3 Months | 6 Months

### Qualification

Plus Two & Above

### Certification

(CTDS), Skillzyn

Competitive pay with project-based incentives and overseas opportunities.
- Wide Project Exposure**  
Experience in residential, commercial, infrastructure, and industrial projects.
- Global Career Opportunities**  
Skills aligned with international standards support employment abroad.

## Course Module

- 1. Introduction to QA | QC (Civil)**
  - » Quality concepts in civil engineering projects
  - » Roles and responsibilities of QA/QC professionals
  - » Project quality objectives and standards
  - » Career pathways in civil QA/QC

## **2. Quality Management Systems & Standards**

- » ISO 9001 quality management system
- » Civil construction standards and codes
- » Quality documentation and audits
- » Compliance and regulatory requirements

## **3. Civil Drawings & Specifications**

- » Reading and interpretation of civil drawings
- » BOQ, specifications, and tolerances
- » Method statements and work procedures
- » Site coordination and quality checks

## **4. Construction Materials & Testing**

- » Cement, aggregates, concrete, and steel testing
- » Soil testing and earthwork quality control
- » Concrete mix design and cube testing

## **5. Site Inspection & Quality Control Procedures**

- » Incoming, in-process, and final inspections
- » Inspection and test plans (ITP)
- » Checklists and site quality records
- » Non-conformance reporting (NCR)

## **6. Structural & Finishing Works Quality Control**

- » RCC, masonry, and structural works inspection
- » Waterproofing and finishing quality checks
- » Road, pavement, and infrastructure works
- » Safety and workmanship standards

## **7. Laboratory & Field Testing Practices**

- » On-site and laboratory testing procedures
- » Test result interpretation and reporting
- » Calibration and equipment control
- » Quality assurance in testing

## **8. Documentation, Audits & Corrective Actions**

- » Quality documentation and record control
- » Internal and external quality audits
- » Corrective and preventive actions (CAPA)

## **9. Industrial Practices, Safety & Career Development**

- » Construction safety and quality integration
- » Case studies and practical exposure
- » Interview preparation and career guidance
- » Placement assistance and professional development
